

SCAMSHIELD AI — DIGITAL FRAUD & THREAT INCIDENT REPORT

Generated by ScamShield AI Platform | Date & Time: 2026-09-18 13:55:39

Incident Report ID:	#00021	Analyzed User:	Security Tester
Analysis Date:	2026-09-18 13:55:39	Language:	EN
Scam Category:	Banking Phishing	Assigned Risk:	HIGH RISK — FRAUD / SCAM DETECTED

1. Submitted Communication Message

"Dear customer, your SBI account KYC has expired. Update immediately at <http://sbi-kyc-update.xyz> to prevent card blocking."

2. AI Risk Prediction & Detailed Explanation

The message purports to be from State Bank of India (SBI) warning that your KYC has expired and threatening immediate card blocking if you do not update via an unofficial link. This exhibits standard phishing tactics designed to steal sensitive banking credentials.

3. What We Detect (Threat Pattern Analysis)

- **Urgency / Pressure Tactics:** Demands prompt compliance or threatens punitive action.
- **Credential Phishing:** Solicits sensitive OTPs, passwords, PINs, or net banking information.

4. Suspicious Indicators Detected

- Impersonation of a major financial institution (SBI)
- Use of an unofficial, suspicious URL domain ('<http://sbi-kyc-update.xyz>') instead of the legitimate bank website
- Artificial sense of urgency threatening immediate account/card blocking
- Generic salutation ('Dear customer') rather than personalized greeting

5. URL & Link Safety Analysis

Detected URL: <http://sbi-kyc-update.xyz>

- Unencrypted HTTP protocol: Data transmitted in plain text without SSL/TLS encryption.
- High-risk top-level domain (.xyz): Cheap or free domain extension heavily abused by phishing operators.
- High-risk brand / urgency keywords in URL: 'update, kyc, sbi'.

6. Safety Recommendations

- ✓ Do not click on the provided link or enter any personal or banking details.
- ✓ Remember that legitimate banks do not send SMS messages with links to update KYC details.
- ✓ Verify your account status directly via the official SBI internet banking portal or mobile app.

7. Immediate Actionable Next Steps

Step 1: Block the sender number on your device.

Step 2: Report the phishing attempt to SBI customer support or cybercrime authorities.

Step 3: Delete the message to prevent accidental clicks.
