

SCAMSHIELD AI — DIGITAL FRAUD & THREAT INCIDENT REPORT

Generated by ScamShield AI Platform | Date & Time: 2026-09-18 13:59:54

Incident Report ID:	#00022	Analyzed User:	sravya
Analysis Date:	2026-09-18 13:59:54	Language:	EN
Scam Category:	Prize / Lottery Scam	Assigned Risk:	HIGH RISK — FRAUD / SCAM DETECTED

1. Submitted Communication Message

"Congratulations! You have won ₹50,000 in Tata Lottery. Pay ₹499 processing fee immediately and click the link below to claim your reward: <http://tata-lottery-claim.xyz/reward>"

2. AI Risk Prediction & Detailed Explanation

The message claims the recipient has won a large monetary prize from 'Tata Lottery' and demands an immediate upfront processing fee to release the funds, providing a suspicious link.

3. What We Detect (Threat Pattern Analysis)

- **Urgency / Pressure Tactics:** Demands prompt compliance or threatens punitive action.
- **Payment Demands:** Upfront fees, processing charges, or direct UPI transfer requests.

4. Suspicious Indicators Detected

- Unsolicited claim of winning a lottery or cash prize without prior entry.
- Demand for an advance fee ('processing fee' of ₹499) to claim winnings.
- Urgent language urging the user to pay 'immediately'.
- Inclusion of an unofficial, suspicious domain name (.xyz TLD) impersonating a reputed brand.

5. URL & Link Safety Analysis

Detected URL: <http://tata-lottery-claim.xyz/reward>

- Unencrypted HTTP protocol: Data transmitted in plain text without SSL/TLS encryption.
- High-risk top-level domain (.xyz): Cheap or free domain extension heavily abused by phishing operators.
- High-risk brand / urgency keywords in URL: 'claim, reward, lottery'.

6. Safety Recommendations

- ✓ Do not click on the link provided in the message.
- ✓ Never pay any upfront fee, tax, or processing charge to claim a prize.
- ✓ Treat unsolicited lottery announcements, especially those demanding fees, as extremely high risk.

7. Immediate Actionable Next Steps

Step 1: Block the sender and report the message as spam/phishing on your messaging platform.

Step 2: Report the suspicious URL and communication to your local cybercrime reporting portal.
